**PCT**

**NOTIFICATION OF ELECTION**

(PCT Rule 61.2)

From the INTERNATIONAL BUREAU

To:

Assistant Commissioner for Patents  
United States Patent and Trademark  
Office  
Box PCT  
Washington, D.C. 20231  
ÉTATS-UNIS D'AMÉRIQUE

in its capacity as elected Office

Date of mailing (day/month/year) 17 January 2000 (17.01.00)	Applicant's or agent's file reference P004733WOCTH
International application No. PCT/GB99/01607	Priority date (day/month/year) 22 May 1998 (22.05.98)
International filing date (day/month/year) 21 May 1999 (21.05.99)	
Applicant MITRAPHANOUS, Kyriacos, Andreou et al	

1. The designated Office is hereby notified of its election made:

in the demand filed with the International Preliminary Examining Authority on:

09 December 1999 (09.12.99)

in a notice effecting later election filed with the International Bureau on:

2. The election

was

was not

made before the expiration of 19 months from the priority date or, where Rule 32 applies, within the time limit under Rule 32.2(b).

## NOTIFICATION RELATING TO PRIORITY CLAIM

(PCT Rules 26bis.1 and 26bis.2 and Administrative Instructions, Sections 402 and 409)

From the INTERNATIONAL BUREAU

To:

HARDING, Charles, Thomas  
D. Young & Co.  
21 New Fetter Lane  
London EC4A 1DA  
ROYAUME-UNI

Date of mailing (day/month/year) 16 August 1999 (16.08.99)	<b>IMPORTANT NOTIFICATION</b>
Applicant's or agent's file reference P004733WOCTH	
International application No. PCT/GB99/01607	International filing date (day/month/year) 21 May 1999 (21.05.99)
Applicant OXFORD BIOMEDICA (UK) LIMITED et al	

The applicant is hereby notified of the following in respect of the priority claim(s) made in the international application.

1. ☒ **Correction of priority claim.** In accordance with the applicant's notice received on: 21 July 1999 (21.07.99), the following priority claim has been corrected to read as follows:  
US 17 July 1998 (17.07.98) 60/093149  
☐ even though the indication of the number of the earlier application is missing.  
☐ even though the following indication in the priority claim is not the same as the corresponding indication appearing in the priority document:
2. ☐ **Addition of priority claim.** In accordance with the applicant's notice received on: , the following priority claim has been added:  
☐ even though the indication of the number of the earlier application is missing.  
☐ even though the following indication in the priority claim is not the same as the corresponding indication appearing in the priority document:
3. ☐ As a result of the correction and/or addition of (a) priority claim(s) under items 1 and/or 2, the (earliest) priority date is:
4. ☐ **Priority claim considered not to have been made.**  
☐ The applicant failed to respond to the invitation under Rule 26bis.2(a) (Form PCT/IB/316) within the prescribed time limit.  
☐ The applicant's notice was received after the expiration of the prescribed time limit under Rule 26bis.1(a).  
☐ The applicant's notice failed to correct the priority claim so as to comply with the requirements of Rule 4.10.  
 The applicant may, before the technical preparations for international publication have been completed and subject to the payment of a fee, request the International Bureau to publish, together with the international application, information concerning the priority claim. See Rule 26bis.2(c) and the PCT Applicant's Guide, Volume I, Annex B2(IB).
5. ☒ In case where multiple priorities have been claimed, the above item(s) relate to the following priority claim(s):  
US 17 July 1998 (17.07.98) 60/093149
6. A copy of this notification has been sent to the receiving Office and  
☒ to the International Searching Authority (where the international search report has not yet been issued).  
☒ the designated Offices (which have already been notified of the receipt of the record copy).

### INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference P004733WOCTH	<b>FOR FURTHER ACTION</b> See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416)	
International application No. PCT/GB99/01607	International filing date (day/month/year) 21/05/1999	Priority date (day/month/year) 22/05/1998
International Patent Classification (IPC) or national classification and IPC C12N15/86		
Applicant OXFORD BIOMEDICA (UK) LIMITED et al.		

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.

2. This REPORT consists of a total of 6 sheets, including this cover sheet.

☒ This report is also accompanied by ANNEXES, i.e. sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).

These annexes consist of a total of 3 sheets.

3. This report contains indications relating to the following items:

- I ☒ Basis of the report
- II ☐ Priority
- III ☐ Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- IV ☐ Lack of unity of invention
- V ☒ Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- VI ☐ Certain documents cited
- VII ☐ Certain defects in the international application
- VIII ☐ Certain observations on the international application

Date of submission of the demand  09/12/1999	Date of completion of this report  29.09.00
Name and mailing address of the international preliminary examining authority:   European Patent Office D-80298 Munich Tel. +49 89 2399 - 0 Tx: 523656 epmu d Fax: +49 89 2399 - 4465	Authorized officer  Huber, A  Telephone No. +49 89 2399 8173

**INTERNATIONAL PRELIMINARY  
EXAMINATION REPORT**

International application No. PCT/GB99/01607

**I. Basis of the report**

1. This report has been drawn on the basis of *(substitute sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to the report since they do not contain amendments.)*:

**Description, pages:**

1-46 as originally filed

**Claims, No.:**

1-20 as received on 23/08/2000 with letter of 21/08/2000

**Drawings, sheets:**

1/6-6/6 as originally filed

2. The amendments have resulted in the cancellation of:

- ☐ the description, pages:  
☐ the claims, Nos.:  
☐ the drawings, sheets:

3. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

4. Additional observations, if necessary:

**see separate sheet**

**INTERNATIONAL PRELIMINARY  
EXAMINATION REPORT**

International application No. PCT/GB99/01607

**V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

**1. Statement**

Novelty (N)	Yes:	Claims	5-7, 11-16
	No:	Claims	1-4, 8-10, 17-20
Inventive step (IS)	Yes:	Claims	5
	No:	Claims	6, 7, 11-16
Industrial applicability (IA)	Yes:	Claims	1-20
	No:	Claims	

**2. Citations and explanations**

**see separate sheet**

**INTERNATIONAL PRELIMINARY  
EXAMINATION REPORT - SEPARATE SHEET**

---

International application No. PCT/GB99/01607

**Re Item I**

**Basis of the report**

Sequence listing pages 1-4 filed with the letter of 16.09.99 do not form part of the application (Rule 13<sup>ter</sup>.1(f) PCT).

**Re Item V**

**Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

1. The present application relates to retroviral delivery systems (vectors) in which the env region of the retrovirus has been replaced by a region coding for at least part of a rabies G protein.
2. Reference is made to the following documents:  
  
D1: Reiser et al., Cold Spring Harbour, Abstract of paper presented at the 1997 meeting: Vector targeting strategies for therapeutic gene delivery, March 14-16, 1997 "High-titer pseudotyped HIV-1 vectors"  
  
D2: WO 98 05759 A (UNIV CALIFORNIA (US)) 12 February 1998 (1998-02-12) cited in the application  
  
D3: WO 95 22617 A (UNIV PARIS CURIE ;KLATZMANN DAVID (FR); SALZMANN JEAN LOUP (FR)) 24 August 1995 (1995-08-24)
3. Novelty and inventive step (Art. 33(2) and (3) PCT):  
  
3.1 The conference report of Reiser et al. (D1) which was kindly provided by the applicant, discloses a three-plasmid expression system used to generate HIV-1

**INTERNATIONAL PRELIMINARY  
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/GB99/01607

particles pseudotyped with VSV-glycoprotein. In addition, rabies G protein has been demonstrated to lead to the formation of HIV pseudotypes, albeit at lower titers ("the titers obtained so far are below the ones obtained with the VSV-G protein"). This does, however, not mean that the pseudotyped HIV-1 vector is not capable of transducing cells. It should also be noted that high virus titers may be desirable but are not required by the claims. There is no indication in D1 that the titer obtained may not be sufficient to be suitable for transducing cells.

In the opinion of the IPEA, the statement in D1 "using the improved vector system, post-mitotic rat cerebellar granule cells were transduced successfully using ShlacZ reporter constructs", cannot be interpreted in the way done by the applicant, namely that HIV pseudotyped with rabies G protein is not capable of transducing a target site. The "improved vector system" of Reiser et al. comprises a defective packaging construct, a plasmid encoding a heterologous env protein and a vector construct harboring a reporter gene such, e.g. ShlacZ. Successful transduction was obtained with the complete vector system, i.e. not only the reporter gene was transduced. The conclusion drawn by the applicant that D1 implies that a target site was not successfully transduced with low titre HIV pseudotypes is therefore not accepted.

The newly introduced term "selectively" is not considered suitable to render the retroviral delivery system of Claim 1 novel over the system of D1. The HIV-1/rabies G protein pseudotypes of D1 are structurally indistinguishable from the retroviral delivery system of Claim 1. The capability of selectively transducing a target site is an inherent property of retroviruses pseudotyped with rabies G protein.

The subject-matter of Claims 1-4, 8-10 and 17-20 is therefore not considered novel in view of D1 (Art. 33(2) PCT).

**3.2 The remaining claims are novel in view of D1, but are considered to lack the required inventive step (Art. 33(3) PCT).**

In D1 it has already been shown that HIV can be successfully pseudotyped with the rabies env protein. The design of targetable vectors with cell-specific and organ-specific tropisms is proposed.

Generally, replacement of the retroviral env gene with a heterologous env gene ("pseudotyping") is widely known from the prior art and its advantage in

broadening the infectious spectrum of the retroviral vectors and in the production of higher titres of the retroviral vectors has been recognized.

D2, for example, discloses the preparation of packaging cells for pseudotyping retroviral vectors.

Pseudotyped retroviral particles are produced by introducing a defective recombinant retroviral genome containing a NOI into a packaging cell line that contains nucleotide sequences coding for retroviral proteins for which the introduced retroviral genome is defective (gag, pol) and an inducible expression system that facilitated expression of a desired envelope protein. In a preferred embodiment, the nucleotide sequence encoding the envelope protein is derived from a rhabdovirus G protein, such as VSV. On page 11, lines 13-16, also rabies G protein is mentioned as choice to form pseudotyped retroviral virions.

Similarly, also D3 discloses a pseudotyped retroviral vector for transducing a NOI into a target cell, wherein the retroviral env gene is replaced by a heterologous env gene, for example the env gene of rabies virus (see claims 1 and 8).

Thus, having regard to D1 in combination with D2 and/or D3 the skilled person would be motivated to introduce a NOI into the pseudotyped retrovirus of D1. In the light of the prior art, it would also be obvious to use the pseudotyped retrovirus of D1 in medicine, resp. in the manufacture of a pharmaceutical composition to deliver a NOI to a target site and for affecting the infectious profile, the host range and/or cell tropism.

Consequently, the subject-matter of Claims 6, 7 and 11-16 does not involve the required inventive step.

- 3.3 Claim 5 is directed to a retroviral delivery system wherein the retroviral sequences are derived from the lentivirus EIAV. Since there is no suggestion found in the prior art which would prompt the skilled person to prepare pseudotyped EIAV-vectors instead of HIV-vectors, an inventive step can be acknowledged for the subject-matter of Claim 5.

## INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference <b>P004733WOCTH</b>	<b>FOR FURTHER ACTION</b> see Notification of Transmittal of International Search Report (Form PCT/ISA/220) as well as, where applicable, item 5 below.	
International application No. <b>PCT/GB 99/ 01607</b>	International filing date (day/month/year) <b>21/05/1999</b>	(Earliest) Priority Date (day/month/year) <b>22/05/1998</b>
Applicant <b>OXFORD BIOMEDICA (UK) LIMITED et al.</b>		

This International Search Report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This International Search Report consists of a total of 3 sheets.

☒ It is also accompanied by a copy of each prior art document cited in this report.

## 1. Basis of the report

- a. With regard to the language, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐ the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).

- b. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international search was carried out on the basis of the sequence listing:

☐ contained in the international application in written form.

☐ filed together with the international application in computer readable form.

☒ furnished subsequently to this Authority in written form.

☒ furnished subsequently to this Authority in computer readable form.

☒ the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.

☒ the statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished

2. ☐ Certain claims were found unsearchable (See Box I).

3. ☐ Unity of invention is lacking (see Box II).

## 4. With regard to the title,

☐ the text is approved as submitted by the applicant.

☒ the text has been established by this Authority to read as follows:

**RETROVIRAL DELIVERY SYSTEM**

## 5. With regard to the abstract,

☒ the text is approved as submitted by the applicant.

☐ the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.

## 6. The figure of the drawings to be published with the abstract is Figure No.

☐ as suggested by the applicant.

☒ because the applicant failed to suggest a figure.

☐ because this figure better characterizes the invention.

3

☐ None of the figures.
